Data Sheet

## EM-PMI375-T1100

Electric machine, permanent magnet internal

## FEATURES

- Synchronous Reluctance assisted Permanent Magnet (SRPM) technology
- Extremely compact and robust aluminum frame structure
- Highest efficiency throughout the operation range on the market ( $\sim 96 \%$ )
- Liquid cooled with water-glycol mixture
- Low coolant flow required
- Allowed coolant temperature up to $+65^{\circ} \mathrm{C}$
- IP65 enclosure class to maximize reliability, IP67 available as option
- Multiple mounting possibilities

## GENERATOR SPECIFIC FEATURES

- Standard SAE flange mounting to match the diesel engine connection
- Wide selection of speed ratings allowing the generator to be selected to customer specific applications with various voltage requirements
- Can be also used as starter motor for the ICE

## MOTOR SPECIFIC FEATURES

- Extended speed and torque capabilities compared to standard PM motors from Danfoss reluctance assisted permanent magnet motor technology
- Motor structure is designed to be able to produce high starting torque: EM-PMI motor can produce instantly full torque to a non-rotating shaft
- Optimized speed range to meet the most common gear ratios used in heavy mobile machinery

## GENERAL

The machine is developed especially for demanding applications. It is smaller, lighter and more efficient than conventional products on the market.

## TYPICAL APPLICATIONS

- Generator for diesel-electric/serial hybrid applications
- Traction/propulsion motor
- Generator/Motor for parallel hybrid applications

## SPECIFICATIONS

|  |  | Standard color | Dark grey RAL7024 powder coating |
| :---: | :---: | :---: | :---: |
| General electrical properties |  |  |  |
| Nominal voltage (line to line) | $500 \mathrm{~V}_{\mathrm{AC}}$ | Mechanical |  |
| Voltage stress | IEC 60034-25, Curve A: Without filters for motors up to $500 \mathrm{~V}_{\mathrm{AC}}$ | Total weight | 295 kg (no options) |
| Nominal efficiency | 96\% |  |  |
| Pole pair number | 6 | Torsional stiffness of shaft drive end | $7^{*} 10 \wedge 5 \mathrm{Nm} /$ rad (from middle of the dend spline to rotor air gap) |
| Power supply | Inverter fed. | Rotating mass | 111 kg |
| Nominal inverter switching frequency | 8 kHz | Maximum static torque range on the shaft, max. 25000 cycles, $\mathrm{R}=0$ (* | 6800 |
| Minimum inverter switching frequency Basic information | 4 kHz (with limited speed 1.4 times nominal speed) | Maximum dynamic torque range on the shaft, max. 1e6 cycles, $\mathrm{R}=0$ (* | 4000 |
| Machine type | Synchronous reluctance assisted permanent magnet | Maximum allowed vibratory torque range, $1 \mathrm{e} 9 . . .1 \mathrm{e} 10$ cycles (* | $0.3 \times$ Nominal torque of machine |
| Frame material | Aluminum |  |  |
| Mounting direction | Can be used in all directions, see user guide for details. Greased for life bearings required. | Maximum deceleration (fault stop) | $2000 \mathrm{rad} / \mathrm{s}^{2}$ |
| Mounting <br> (IEC 60034-7) | IM 3009-B5 (Flange horizontal), IM 3019-V1 (Flange and D-end down) | Length (frame) | 548 mm |
| Standard Flange D-end (SAE J617) | SAE 3 mating transmission housing | Diameter (frame) Cooling | 450 mm |
| Bearing type | Standard: 6214/C3 (with LGHP2 grease) <br> +BGL option: 6214-2RS1/C3WT <br> +BIN option: D-end: 6214/C3 (with <br> LGHP2 grease), N-end: 6214/HC5C3 (with LGHP2 grease) | Cooling liquid | Plain water with appropriate corrosive inhibitor (max. 50 \% corrosive inhibitor) |
|  |  | Cooling liquid corrosive inhibitor type | Ethylene glycol Glysantin G48 recommended |
|  | +BIA option: 6214/HC5C3WT (with LGHP2 grease) | Cooling method (IEC 60034-6) | $\text { IC } 71 \text { W }$ |
|  | +BGL+BIN options: D-end: 6214- <br> 2RS1/C3WT, N-end: 6214-2RS1/HC5C3WT |  |  |
|  | +BGL+BIA options: 6214-2RS1/HC5C3 | Minimum cooling liquid flow | $201 / m i n$ |
| Standard axle spline Dend | DIN5480 W55x2x26x8a | Coolant circuit capacity | 2.81 |
| Standard Flange N-end (SAE J617) | SAE 4, flywheel housing | Maximum operating pressure | 3 bar |
| Standard rotation direction | Clockwise (both directions possible) | Pressure loss | 0.4 bar with $201 / \mathrm{min}$ ( $+25^{\circ} \mathrm{C}$ coolant) |
| Protection class | IP65 <br> IP67 available as option +IP67 | Nominal cooling liquid temperature | $+65^{\circ} \mathrm{C}$ (derating required if exceeded), $+40^{\circ} \mathrm{C}$ with +CL option |
|  | Tests: 0.3 bar under pressure held for 120 seconds. | Minimum cooling liquid temperature | $-20^{\circ} \mathrm{C}$ |
|  | Pressure not allowed to drop under 0.1 bar (IP65) | Maximum cooling liquid temperature | $+70^{\circ} \mathrm{C}$ |
|  | Pressure not allowed to drop under 0.25 bar (IP67) |  |  |
| Duty type (IEC 60034-1) | S1/S9 |  |  |

Temperature rating

| Insulation class <br> (IEC $60034-1)$ | $\mathrm{H}\left(+180^{\circ} \mathrm{C}\right)$ |
| :--- | :--- |
| Temperature rise <br> (IEC $60034-1)$ | $+85^{\circ} \mathrm{C}(\mathrm{F}) /+110^{\circ} \mathrm{C}(\mathrm{H})$ |
| Maximum winding <br> temperature | $+175^{\circ} \mathrm{C}$ |
| Nominal ambient <br> temperature | $+65^{\circ} \mathrm{C} /+45^{\circ} \mathrm{C}$ with +CL option |
| Min. ambient temperature | $-40^{\circ} \mathrm{C}$ |
| Nominal altitude | 1000 m |
| (IEC $60034-1)$ |  |

Vibration \& Shock tolerance
$\left.\begin{array}{ll}\text { Mechanical vibration } & \begin{array}{l}\text { 5.9 Grms } \\ \text { ISO } 16750-3\end{array} \\ & \text { Test VII - Commercial vehicle, sprung } \\ \text { masses - Table 12 }\end{array}\right]$
(DUAL winding model)

- $1 x$ connection box with one 3 phase system and $1 x$ connection box with two 3 phase systems
(TRI winding model)

## PRODUCT CODE AND OPTIONS

Use product code including all needed options for ordering. Standard options are not given with the code as they are selected by default if a non-standard option is not selected. Standard options are indicated by a star (*).

| Product code | Description |
| :--- | :--- |
| EM-PM1375-T1100-1800 | Standard 1800 rpm unit with standard options |
| EM-PMI375-T1100-1800+BIN+RES1 | Standard unit with insulated bearing in N-end and resolver |

Table 5 Product code examples

| Variant | Code | Description | Additional information |
| :---: | :---: | :---: | :---: |
| High voltage connections | * | One 3 phase system | One connection box containing one 3 phase system with one M25 cable gland per phase |
|  | -DUAL | Two galvanically isolated 3 phase systems | Two connection boxes each containing one 3 phase system with one M25 cable gland per phase |
|  | -TRI | Three galvanically isolated 3 phase systems | Two connection boxes one containing one 3 phase system and another one containing two 3 phase systems with one M25 cable gland per phase |
| Low voltage connections | * | Low voltage connections done with connector | DEUTSCH HD34-24-47PE connector for LV connections |
|  | +LVB1 | Low voltage connections done with connection box and terminal strip | Connection box with $2 \times \mathrm{M} 25$ cable glands (reserve $2 x$ plugged M16 threads available) and terminal block for LV connections |
| N -end attachment | * | Flange | SAE 4 flywheel housing |
|  | +NE2 | Male shaft + Flange | DIN5480 W55x2x26x8a + SAE 4 flywheel housing |
| Bearing lubrication and mounting direction | * | Grease lubricated | Deep groove ball bearing, open design. Horizontal mounting direction (see user guide for details). |
|  | +BGL | Greased for life | Deep groove ball bearing, contact seal on both sides. Any mounting direction (see user guide for details). Maximum speed 3400 rpm . |
| Bearing insulation | * | Non-insulated bearings | Non-insulated bearings |
|  | +BIN | Insulated bearing in N -end | Insulated bearing in N -end |
|  | +BIA | Insulated bearing in both ends | Insulated bearing in both ends |
| Shaft grounding | * | None |  |
|  | +SG1 | D-end shaft grounding | In-built grounding ring |
| Protection class | * | Standard protection class | IP65 protection class |
|  | +IP67 | IP67 protection class | IP67 protection class, only available with +BGL |
| Cable direction | * | Cable direction fixed | Cable direction towards D-end |
|  | +CNE | Cable direction towards N -end | Cable direction towards N -end |
| Rotation sensor | * | None | No resolver |
|  | +RES1 | Resolver | In-built non contacting resolver, 6-pole pair |
|  | +RES2 | Double resolver | $2 \times \ln$-built non contacting resolver, 6-pole pair |
| Side mounting | * | None | No side mounting holes available. In case side mounting holes are present, they are plugged by default. |
|  | +SM1 | Side mounting | $12 \times$ side mounting threaded holes M10x1.5. Plugged by default with M10x10, DIN 913, (ISO 4026), SET SCREW |
| Winding temperature sensors (** | * | Temperature surveillance | $3 \times$ PT100 (two wire) in windings |
|  | +TEMP4 | Redundant temperature surveillance | $6 \times$ PT100 (two wire) in windings |
|  | +TEMP5 | Redundant temperature surveillance | $12 \times$ PT100 (two wire) in windings (Not available with +LVB1 option) |

| Bearing temperature sensors | * | None |  |
| :---: | :---: | :---: | :---: |
|  | +BTMP1 | PT100 in bearings | Plug-in connector |
| Anti-condensation heaters | * | None |  |
|  | +HEAT1 | One anti-condensation heater | $230 \mathrm{~V}_{\text {AC }} / 130 \mathrm{~W}$ |
| Marine classification | * | No marine classification |  |
|  | +CL1 |  | ABS American Bureau of Shipping |
|  | +CL2 |  | BV Bureau Veritas |
|  | +CL3 |  | DNV |
|  | +CL4 |  | LR Lloyd's Register |
|  | +CL5 |  | RINA |
|  | +CL6 |  | CCS China Classification Society |

${ }^{*}$ Standard option
(** Winding temperature sensors are for stator winding. The selection of high voltage connections does not have an influence on the quantity of PT100 elements.

Table 6 Option list
